

PLM & QMS Together

Benefits of Product Lifecycle Management and Quality Management in One Platform

PLM + QMS – Together in One System

Propel is the only enterprise solution that ties product lifecycle management, quality management and customer data in one system.

Unlike other Quality Management systems, Propel easily connects with other systems and is completely built on the cloud - so accessing your customer, product and quality data is easy from any device.

Seamless Feedback Loop

By having product lifecycle management and quality management in one single system organizations can seamlessly loop feedback between customer, quality, and product data,

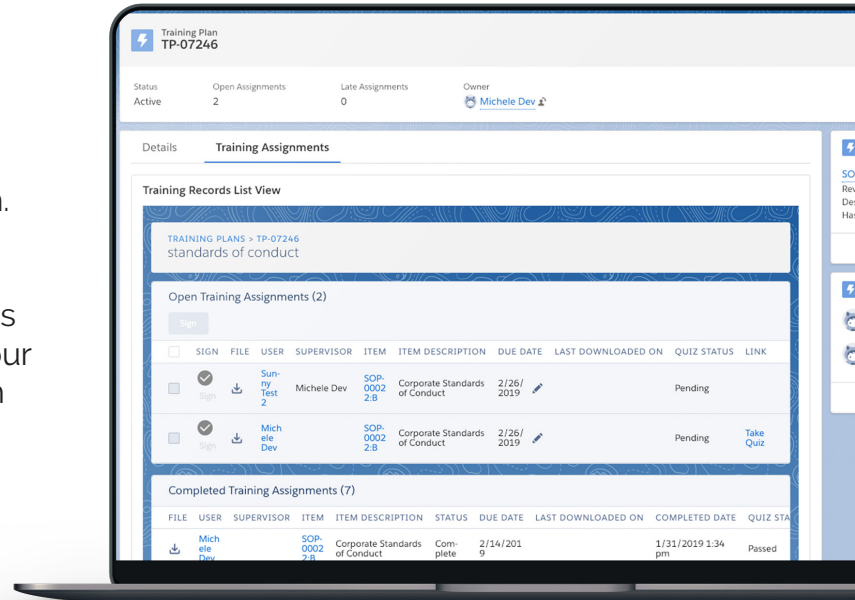

Feeding customer complaints and quality processes directly to your engineering team, allows you to quickly resolve issues as they arise.

Managing Complaints with PLM + QMS

Teams can capture complaints and quality issues in the field and feed them into Propel's pre-configured quality workflows. Propel offers pre-configured workflows for CAPAs, NCMRs, and SCARs so teams can work more effectively to resolve product quality issues.

Training Records with PLM + QMS

Manage and keep track of all training records in Propel to ensure every one is up to date on the latest product changes. Disjointed systems can cause unorganized or mismatched training plans, resulting in non-compliant training and increased risk for your organization and your customers.

BENEFITS OF PLM AND QMS TOGETHER:

- Closed loop from customer complaint to resolution
- Accurate and central view of product, customer and quality data
- Integrated and auditable process
- Lower TCO from single platform

PLM & QMS Together

Benefits of Product Lifecycle Management and Quality Management in One Platform

Focus on Customer-Centricity with PLM + QMS

The rapidly changing business landscape means companies need to start pivoting and embracing customer-focused strategies that make sense for their organization and their products.

When it comes achieving customer-centricity within your organization you need a QMS that seamlessly connects with your CRM and PLM, so you can have a true closed loop that can quickly resolve your product issues and customer complaints.

Propel's cloud-based QMS completely built on Salesforce gives you true customer-centricity by eliminating manual data entry, siloed departmental processes and rigid software configurations that can hamper even the best companies.

With Propel, you can drive higher product quality, increase customer satisfaction and maintain regulatory compliance all within one single system. Propel is cloud-based quality management built for customer-centricity, from concept to customer.
