

CLOUD QMS THAT CREATES A CLOSED LOOP FOR ENGINEERING

Propel provides the only QMS solution that is seamlessly connected with CRM and PLM, so you can have a true closed loop that can quickly resolve your product issues and customer complaints. Propel eliminates manual data entry, siloed departmental processes and rigid software configurations that can hamper even the best companies.

With Propel, you can drive higher product quality, customer satisfaction and regulatory compliance.

QUALITY MANAGEMENT BENEFITS IN PROPEL

Integrate Quality Processes to Improve Responsiveness and Compliance

Propel integrates with Salesforce to capture product issues from customers, partners or IoT feeds. Make it easy for everyone to collaborate on quality management processes, CAPAs, NCMRs, SCARs and ECOs.

Ensure Employee Certification and Compliance with Comprehensive Training Records

Use Propel to track every employee's training requirements, identify who is non-compliant, and notify employees of upcoming training. Propel ensures employee training records get updated based on the latest product updates.

Track Product Specifications to Ensure Compliance to Industry Standards

Use Propel's quality management software to track compliance of items to regulatory and environmental specifications like RoHS, WEEE, REACH, China RoHS, JEDEC, Japanese Green Initiative, and Conflict Minerals standards.
